

Gauge Pod Installation Instructions

Warning - Do not install pod in vehicles with side airbag curtains.

1. Temporarily install the gauge pod on the factory A-pillar trim in the exact location where you would like for it to be mounted.
2. If you are installing a Full Length Pillar; it is a cover, not a replacement. It must be attached to the factory A-pillar trim.
3. Mark the location on the factory A-Pillar trim using a marker or scoring tool in order to install the gauge pod securely.
4. If desired you may paint the Gauge Pod to match the factory interior color. Before painting clean the surface of the pod with alcohol.
5. Carefully remove the factory A-pillar trim piece from the vehicle. Please refer to a repair manual if you are unsure of proper removable.
6. Push the gauges into the pod and then place pod on the factory A-pillar trim piece to see how much clearance is available for wires and the gauges.
7. It may be necessary to drill an opening in the factory A-pillar trim piece, to allow room for the wiring and the gauge, if necessary.
8. Attach the wires to each gauge as described in the gauge instructions.
9. With the gauge pod on the factory A-pillar trim, lined up with the location marks from step 3, install the provided screws into each corner, and cap the screws.
10. You can also use Velcro, glue, double sided tape, or rivets to attach the gauge pod to the factory A-pillar.
11. Reinstall the new A-pillar trim in the vehicle.

Additional Installation Information & Material Requirements

- **GlowShift Gauges Approved Conductor Wires:** Successfully installing GlowShift Gauges may require lengths of wire (sizes and quantity depend on vehicle, gauge type, gauge location and / or sensor location). For correct and proper GlowShift Gauge installation and operation, the use of 18 Gauge (wire diameter) automotive grade conductor wire with sheathing is recommended for one or more gauges per vehicle. When installing and routing wires from the engine compartment, to inside the vehicle cabin, always employ the use of a rubber grommet. This will prevent and deter the stripping of power supply and / or sensor wires that is necessary to deliver vital statistics about your engine to your GlowShift engine monitoring instruments. Never use wire nuts to fasten or bound vehicle / gauge or sensor wiring. Always use securing crimp connectors or solder individual wire junctions together for optimum gauge installation and operation.
- **GlowShift Gauges Approved Installation Accessories:** GlowShift Gauges may require the installer or user to provide additional products, accessories or adapters for the correct installation and operation of a gauge or sensor, as per the GlowShift Installation Instructions. When installing and routing hoses to or from the engine compartment, to inside the vehicle cabin, always employ the use of a rubber grommet. This will prevent and deter the stretching or pinching of hoses that is necessary to deliver vital statistics about your engine to your GlowShift engine monitoring instruments.
- **GlowShift Gauges Installation Instructions:** Installation documents are solely to provide a guide for individuals that are mechanically and electronically able to install products. If you are unsure about the correct procedure of installation for a product or device, you should consult a professional mechanic or an Authorized GlowShift Installer.

Limited Warranty and Disclaimer

GlowShift Gauges, LLC. products come with a one year limited warranty on the internal parts of the product. This warranty starts from the date of purchase. GlowShift Gauges, LLC. will replace or repair any qualifying defective product received by the company before the end of the warranty period. Installation of this product must be performed by a licensed professional. Should the failure of the product be the result of damage occurring as a result of improper installation, alteration of the product or an act or omission on the part of the consumer, this warranty is void. GlowShift Gauges, LLC. shall not be responsible for any consequential damages which arise from the use and/or installation of the product. If the kit is installed in any manner other than specified, GlowShift Gauges, LLC. reserves the right to deny any warranty claims at the discretion of the technical support department. The one year warranty is not transferable and is valid for up to one year from the original date of purchase. Any product return must include the original packaging, a statement of the alleged defect and an RMA number must be provided. All RMA numbers are valid for 14 days from issued date. Upon receipt of the returned product, the company will test the product for defect. If the results of the testing do not support the warranty claim, do not reveal any defect or indicate consumer negligence in the installation and handling of the product, then the product will be returned to you and you will be charged a reshipping fee. If the product is returned from an address within the continental United States, within the first 14 days after purchase, and is found to be defective, GlowShift Gauges, LLC. will cover the cost of the return shipping with an emailed return label. This offer is only valid for the continental US. All international shipping, customs fees and/or duty charges are solely the responsibility of the consumer.
