

Dual Dash Gauge Bracket for 2015-2021 Ford Mustang Performance Pack

This Gauge Pod will only work with vehicles equipped with the Ford Performance Package.

1. Carefully remove the dash trim by releasing the spring clips using a panel pop tool.
2. Unplug the connector for the factory gauge set between the two vents.
3. Using a Phillips head screwdriver, remove the 4 screws that hold the factory gauge assembly.
4. Following the instructions included with the gauges, install the gauge sensors and run the wiring to the dash location.
5. Secure the gauges into the Performance Pack Gauge Mount and secure using the supplied brackets that come with the gauges. Trimming the bracket may be necessary.
6. Place the gauges and mount assembly into the factory dash trim from the backside and secure using the factory screws that were removed.
7. Plug in the connectors to the back of the gauges.
8. Reinstall the dash trim to the vehicle.
9. Check for leaks and test the operation of the gauges.
