

### OIL FILTER SANDWICH ADAPTER

- 1. (Optional)** Raise the vehicle using a jack and support it using jack stands.
- 2.** Drain the engine oil by removing the oil pan drain plug using a wrench. Once the engine oil has been drained, reinstall the drain plug.
- 3.** Remove your vehicle's oil filter and make sure there is enough clearance for the oil filter sandwich adapter.
  - It may be necessary to adjust some of the wire harnesses in this location in order for the sandwich adapter to fit.
- 4.** Install your gauge's temperature or pressure sensors to one of the 1/8th NPT ports located on the adapter. Install all necessary oil feed lines or any other sensors at this time.
- 5.** If you are only installing one sensor, use the provided plugs to plug the other open ports.
- 6.** Be sure to use Teflon tape on all sensor and port plugs to ensure no leaks will occur.
- 7.** Install your GlowShift Oil Filter Sandwich Adapter to the threads where your oil filter is usually mounted. Be sure to use a small amount of oil on the new O-Ring of the Oil Filter Sandwich Adapter for lubrication.
- 8.** Do not over-tighten the sandwich adapter. If the sandwich adapter is over-tightened the gasket that seals it could tear and result in oil leaks. It should be a little more than hand-tight, similar to an oil filter.
- 9.** Install a new oil filter to the threads on the sandwich plate adapter. Be sure to use a small amount of oil on the O-Ring of the new oil filter for lubrication.
- 10.** Fill the engine with the required amount of engine oil as per manufacturer specifications.
- 11.** Once your sandwich adapter is installed with your sensors attached, finish installing the rest of your gauge as per the included instructions.
- 12.** Start the engine and check the sandwich adapter and oil filter for any leaks.
